

How to *get started* with Wellthy

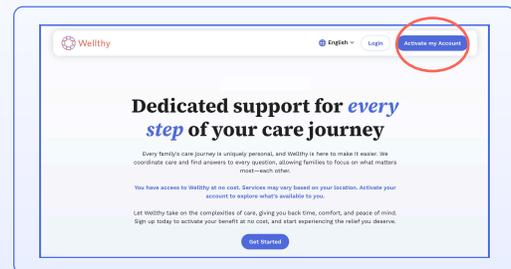

Follow the steps below to create your account, connect with a Care Coordinator, or begin using the self-service tools within the Care Dashboard.

Whether you're planning for caring responsibilities, navigating the aftermath of a sudden event or new diagnosis, managing an ongoing condition, or simply want to connect with others who are caring, Wellthy's suite of offerings meet you wherever you are in your caring journey.

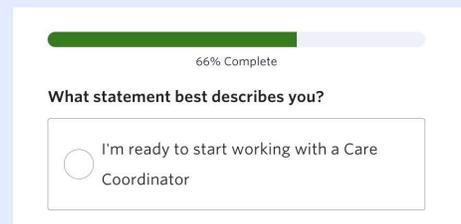

1 Create an account

Visit wellthy.com/member/voya and click 'ACTIVATE MY ACCOUNT'. Enter your name, email, and a password. You'll need access to your email to verify your account.

2 Confirm you eligibility

To verify you have sponsored access to Wellthy's services as a covered benefit, you will need to confirm your eligibility during the onboarding process.

3 Start a Care Project or explore Wellthy Community

We'll ask for a bit of information on who you're caring for so we can match you with the best-fit expert on our team. As a final step, let us know if you're ready to start working with a Care Coordinator, or simply choose your Wellthy Community display name to connect with other family caregivers.
